

# Keystone Jacks Module

## Description:

FIBERNET Keystone jacks module give the solution to install keystone jacks or Pre-terminated copper bundle in 1U rack-mount modular chassis.

The module can be install in a standard FIBERNET FMT4 series chassis.

The modular FMT4 series bring the possibility to install fiber optics module and copper module in the same 1U rack-mount chassis and form a hybrid rack-mount unit.

## Features:

- > Easy and fast installation.
- > Optional grounding\* of the module.
- > Up to six keystone jacks in one module.
- > Up to four fiber\copper module in FMT4 series rack-mount.
- > Compatible with FIBERNET RJ45 Cat.6A Slim Keystone's Jacks or with In-Line Couplers Cat.6A.
- > Compatible with IEC 11801:2011 (Ed.2.2), IEEE 802.3af (2003), IEC 60603-7-51:2010, EN 50173 and TIA-568-C.2 Cat. 6A standards.
- > Suitable for PoE Plus applications in compliance with IEEE 802.3af (2003).
- > Printed Ports numbers
- > UL Verified
- > RoHS Compliant.

## Ordering Information:

FMT4-RJ45 - CAT.6A Keystone's Panel without Keystone's.

FMT4-PR6 - CAT.6A Keystone's Panel with Six Keystone's.

\*Grounding kit not include.
