# MTP® PRO Patch Cord

The MTP®PRO patch cord is bend-insensitive and pre-terminated with low-loss factory-polished MTP®PRO connectors. MTP® PRO design enables quick and effective polarity and pin reconfiguration without the need to remove the connector housing or handle loose pins. Field configuration has never been easier. Simple insertion into the MTP®PRO tool reverses the keying configuration by retracting the exposed key while simultaneously extracting a hidden key on the opposite side of the connector.
