

## STM-UA – Secure Kill Switch Timer for USB and Audio Peripherals

Fibernet's STM-UA is a desktop USB and audio timer controlled with a physical button on the front panel, designed for use on a single station, in the home or office environment.

The goal is to achieve an absolute physical disconnection of USB and/or audio peripherals communication when those are not in use to avoid privacy issues due to a forgotten active video conference nor unauthorized remote access to your system.

The STM-UA is a secure device certified by the highest Israeli cybersecurity regulator.

### Applications:

- Work from home
- Workstations in secure environments

### Features:

- Complete physical shutdown of USB and audio peripherals
- Easy to operate timer, add time or shutdown
- Visual countdown
- Audio warning from 60 seconds before timer shutdown

### Benefits:

- Support up to 4 peripherals at once, 2 USB and 2 3.5mm jacks
- Compact desktop format
- Plug and Play
- Pass-through USB 2.0 and analog audio signals

### Specifications:

Parameter	Value
Input Connector	2x USB-A, 2x 3.5mm audio Jack
Output Connector	2x USB-A, 2x 3.5mm audio Jack
Maximum Power Consumption	5W
Operating Temperature	0°C ~ +45 °C (+32°F ~ +113°F)
Storage Temperature	-40°C ~ +90°C (-40°F ~ 194°F)
Operating Humidity	90% max, non-condensation
Weight	420gr (0.92 lb.)
Dimensions	108x62x26mm (4.25x2.44x1.02")
Color	Black
