An end-to-end integrated hardware/ software solution enabling control, monitoring and distribution of multiple VIDEO/AUDIO sources and flexible display configurations across various targets/ workstations/screens while maximizing network efficiency, ensuring high image quality, and minimizing latency.

### ANY-TO-ANY AV OVER IP

mvision provides high-resolution video performance with minimal latency and advanced user-friendly video display management capabilities suitable for various projects ranging from airport command centers to a smart classroom

Built-in advanced multi-view/video wall management capabilities.

**System survivability:** A malfunction of one of the system's components does not disable the entire system, allowing it to continue to function despite failures or other events.

A dedicated touch screen provides control and monitoring capabilities and allows routing of sources and destinations and complete control over end and third-party units.

The Innovative user-friendly and intuitive control software provides a work environment adapted to the configurations of command centers, large conference rooms, classrooms of any size. Enables management of permissions, admin. capabilities

and monitoring of over IP cyber protection measures.

٢

( **P** 

**Unidirectional-based cyber security** that protects computers and prevents the leak of information between networks of different classification levels.

## **MVISI@N**FAV100

## Audio/Video distribution solutions using the H.264/265 compression protocol

**Audio/video distribution solutions** using the H.264/265 compression protocol.

**Optimal solution for mega projects** due to online video compression efficiency.

#### Remote support.

**The H.264/265 compression protocol** is fully compatible with a wide range of devices, from cameras to decoders and media players.

**Video wall management and KVM switching** for full online control.

**Simultaneous display** of multiple video sources on a single screen

## MVISI@NFAV20

### Audio/Video compression and distribution solution based on 200 JPEG protocol

Maintains optimal video quality at a 4K60 resolution.

Near Zero latency

Streams audio using DANTE

**Supports USB2.0** and the online transfer of files

Advanced KVM capabilities

Video wall management capabilities

# Super **Vision**

SUPERVISION is a software program for control, management, and monitoring of audio/video distribution across the ethernet in multimedia projects of any scale.

The software provides a dynamic, innovative, user-friendly environment that supports AV over IP solutions of any configuration and scale.

**Permission management,** including option of full control by administrator.

High-resolution touchscreen.

touchscreen preview.

3

Quick and user-friendly room definition/building process with

Scenarios can be managed, changed and edited.

Dashboard provides real-time status updates.

All controllable endpoints/third party components are fully supported.

Supports multiple languages.

Fully compatible with other control and monitoring systems

**Enables management** and editing of video walls, and control and monitoring of cyber security components of the AP over IP solution.

Multiview management and editing.

OSD interface for remote workstations.

### mvision - Flawless any-to-any Over IP made simple

mvision solutions provide an effective end-to end response, including a unique cyber security solution, while maintaining high resolution and low latency for every desired configuration of AV over IP
